

Rehabilitation Specialist

Empower patients to regain strength and function through guided therapeutic movement and recovery-focused education.

About the Role

As a Rehab Specialist, you'll bridge chiropractic care and long-term wellness, guiding patients through individualized rehab and mobility programs.

Responsibilities

- Teach corrective exercises and track progress.
- Educate on posture, movement, and home programs.
- Collaborate with providers to refine care plans.

Qualifications

- Degree or background in kinesiology/exercise science.
- Excellent teaching and motivational skills.
- Patient-focused and detail-oriented.
